Vitasence, a local skincare company that combines the potency of biodynamic plant ingredients with the efficacy of contemporary scientific research. Our favourite is the Cleansing Mousse, which contains moisturising amino acids (a major constituent of collagen), instead of harsh detergents to not only clean your face but boost cell growth and regenerate tissue too. That's all you need to stay gorgeous this month. We absolutely guarantee it!

the new players

Beauty products have transformed from the simple, functional items of the past to the highly sophisticated, high-tech products we see today.

THE NEW PLAYERS
Beauty products have transformed from the simple, functional items of the past to the highly sophisticated, high-tech products we see today.

VITASENCE
This homegrown brand of high-tech herb-based skincare has been a cult favourite among the holistically-attuned since 1998, when its creator, herbalist Coreena Ong, began selling it online. Products make use of biodynamically-grown plant ingredients from Europe and parts of Asia, in the form of the Deep Whitening Treatment, Cell Renewal Serum and Pore Clarifying Essence — surefire favourites.

crystal clear

Crystal clear skin is the ultimate goal for many women.

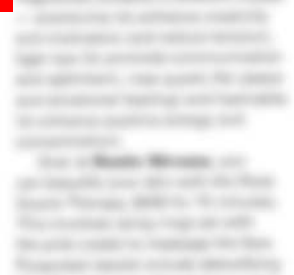

CRYSTAL CLEAR
Crystal clear skin is the ultimate goal for many women. It's a skin that is free of blemishes, redness, and irritation. It's a skin that is hydrated and healthy. It's a skin that is the envy of all.
