# CLEANSER

## Save Your Face

Besides the make-up we put on every day, we pick up impurities and harmful free radicals from the environment, leaving our faces caked with grease and dirt. To keep skin fresh and clean, Vitasence's award-winning Cleansing Mousse with Amino Acid is an ultra-gentle foaming cleanser that removes dirt without upsetting skin's natural balance. Better yet, this marvel doubles up as a make-up remover. Meanwhile, olive oil saponins and marine algae extract pamper skin with essential amino acids so you can reveal a clean, clear complexion every day.

# sun-safe skin

No amount of anti-ageing products will help if we do not first take steps to protect our own skin from the sun. So, before you head out, be sure to apply a soothing layer of Vitasence's Protective Hydrator SPF 30 PA+++ which provides skin-saving protection your skin needs to cope with harsh UV rays and other environmental stressors as you go about your day. It contains bioactive yeast ferment to prevent inflammation and damage from sun exposure, plus oxido reductase, which helps skin fight the effects of pollution. Just what you need to stay sun-safe!
