

# Optimize the Beauty of Your Breasts

## With Thailand's Wonder Herb

*Pueraria mirifica* is an indigenous herb of Thailand. Since 1991, extensive studies on this herb have been conducted by researchers in the Department of Biology in the Chulalongkorn University.

Studies have suggested that *pueraria mirifica* could be a potential alternative to hormone replacement therapy as it is rich in natural phytoestrogens, including isoflavones, deoxymiroestrol, genistein, daidzein, coumestrol, genistin etc. These natural phytoestrogens can bind to estrogen receptors to help slow down the effects of aging. As such, phytoestrogens from *pueraria mirifica* can correct hormonal imbalances and relieve post-menopausal symptoms.

### **Clinical Study On Pueraria Mirifica For Bust Enhancement**

- *Topical applications of Bust Beauty Treatment on the breasts direct absorption of the benefits of pueraria mirifica by the breast tissues.*
- *The phytoestrogens in pueraria mirifica bind themselves to the estrogen receptors found in breast tissues and help to enhance development of the mammary tissues by lengthening and branching the ducts that connect to the nipples.*
- *Pueraria mirifica also helps to increase fatty tissues and ligaments around the breasts to provide shape and support.*
- *Stimulates development of collagen which improves the natural appearance and firmness of the breasts.*

### ***Additional Tips for Optimizing the Beauty of Your Breasts:***

- *Drink at least 2 glasses of fresh milk or soy milk daily.*
- *While massaging your breasts with Bust Beauty Treatment Crème, massage your nipples gently as well. This will also help to promote circulation for better breasts health.*
- *Make sure that you are wearing well-fitting bras.*
- *Go bra-less while you sleep.*
- *In the shower, run cold water on your breasts for one minute. This has toning and stimulating effect on the breast tissues.*

### ***Premium Grade Pueraria Mirifica Used In Bust Beauty Treatment***

*There are varying grades of pueraria mirifica in the market. For the production of Bust Beauty Treatment, only pueraria mirifica that has been certified as premium grade with approved phytoestrogen composition is used.*
