

Cell Renewal Serum

Cell Renewal Serum is the perfect, non-abrasive renewal treatment for your skin. It dissolves rough, dull skin cells and removes pollutants from the pores gently but effectively. It contains active botanical factors that penetrate into the deeper layers of your skin to enhance cell metabolism and promote collagen and elastin production.

Key Ingredients:

Multiple Flower Acids

Natural beta hydroxyl acids derived from Freesia, Hibiscus, Tiare and White Lily. Multiple flower acids exfoliate your skin gently to reveal a youthful, radiant complexion like a fresh, delicate blossom.

Multiple Fruit Acids

Multiple fruit acids derived from grapes, apples and berries are gentler on the skin than glycolic acid alone. In addition, multiple fruit acids are rich in natural antioxidants which give your skin that extra boost against free radicals attack.

Micro-Encapsulated Lactic Acid

Lactic acid is encapsulated to provide gentle, progressive exfoliation. It penetrates clogged pores and clears away trapped dead cells, oil and impurities.

Micro-Encapsulated Salicylic Acid

Salicylic Acid is encapsulated to synergize with lactic acid for double pore-cleansing actions. It dislodges trapped oils and dead skin whilst refining the pores.

Biodynamic Larrea Divaricata Extract

A natural botanical extract from Chaparral bushes found in Californian, Mexican and Australian deserts, Larra Divaricata is rich in lignan NDGA, a cell growth regulator that helps to strengthen your skin, refine and smoothen skin texture and enhance elasticity and radiance to your skin.

Saccharide Isomerate

A natural skin moisturizing factor that helps to optimize your skin's moisture level whilst protecting your skin from irritation.

With regular use, you will notice visible improvements in your skin texture and appearance. The skin looks radiant, healthy and revitalized.

Cell Renewal Serum 30ml

Suitable For All Skin Types

**FOR YOUR SKIN TO LOOK RADIANT,
HEALTHY AND REVITALIZED**

Exfoliates Your Skin Without Abrasion

At Vitasence, we do not believe in scrubbing your skin with abrasive scrubs. Inspections under the microscope have shown that scrubs, no matter how fine the particles, can leave behind scratches on the skin. Long-term scrubbing will therefore lead to skin damage, especially for those with fragile and sensitive skin.

However, exfoliation is a necessary part of any skin care regime as it helps to keep the skin's cell renewal rate at a healthy level. Exfoliation will also speed up the removal of unhealthy skin cells or superficial scars caused by acne.

Extra Tips

#1 Active Cell Renewal Serum is for night-time use only. only two to three times weekly. You can start with nightly use for the first six nights; thereafter use Vitasence products to give you faster results. You can mix and match

#2 Active Cell Renewal Serum synergizes well with other the products to suit your skin's special needs.

#3 You may notice some peeling of your skin. Don't try to peel off the dead skin or use any scrubs. Just continue using Cell Renewal Serum at night with Youth Potion or Super Actives Whitening Complex. The peeling will gradually subside and you'll be left with healthy, baby-smooth skin.

#4 If you have sensitive skin, you may feel some tingling, itching sensation. Therefore, begin by using very small amounts. Your skin will become progressively healthier with regular use.

#5 Always use a sunblock, such as Protective Hydrator, during the day.
